

I am concerned about the FCC's consideration of expanding LPFM stations to take priority over current FM translator services. This would affect one of our family's favorite radio stations, K-Love. In our area of Bend, OR, K-Love is the only radio station

meeting our specific needs. Also, we believe that if K-Love were displaced, this would affect the local community, since there are no entirely similar radio stations. Lastly, K-Love, is one of the few national, up-lifting, encouraging radio broadcasters available. Please do not allow LPFM broadcast services to take priority over current FM translator services.
